## DISCOVER THE VALUE OF EXPLORATION-ONLY CONSULTING

### FOR COASTAL DEVELOPING COUNTRIES:

#### Own Your Ocean:

Gain sovereignty of your submarine critical mineral deposits, self-determine your approach to managing your resources.

#### Exploration as a Service:

Exploration which is not precursor to foreign exploitation; unlike traditional companies, our exploration focuses on selective responsible resource management on a global scale.

#### Leverage your Newfound Understanding:

You shouldn't need to exploit your seafloor to benefit from it. Use your knowledge to secure international support to conserve your seafloor, to build your sustainable development.

#### A Cleaner Pathway to Net-Zero:

Identifying high grade critical mineral deposits and promoting scrupulous selectivity of projects minimises the need for extensive mining, and the impact of mining activities.

### FOR UNIVERSITIES AND INSTITUTIONS:

#### Empower Coastal Developing Countries:

In working with M-Cubed to drive down the costs of exploration, you'll gain international recognition empowering communities to become our ocean stewards of tomorrow – and contribute to a more sustainable, fairer future.

#### Your Innovation, Our Application:

We can break down the cost barriers to proving our technology, by collaborating on real-world applications and projects – you can launch into the cutting edge of oceanography.

#### A New Era of Ocean Science:

We're passionate about addressing the shortage of skills and opportunities in our sector. Let's proactively support new ocean scientists with real opportunities to gain practical, meaningful offshore experience. Never to tick a box; they will redefine an industry.
